

# LearnGreen

## A Green Solution for Today's Workforce

Welcome to LearnQuest's eco-friendly training initiative, LearnGreen. We are excited to offer our clients a green solution to today's traditional training approach.

### LearnGreen Tip:

Look for this symbol next to the courses that are available as part of the LearnGreen initiative.

### Our LearnGreen initiative incorporates the following eco-friendly steps:

- ◆ Paperless technology. We eliminate the need to mail students printed copies of course materials. Alternatively, students will download the course material, on-demand in PDF format. We also offer registration and confirmations online via our website and through emails.
- ◆ No travel costs. Avoid use of travel through **virtual training**, featuring hands-on **virtual labs**.
- ◆ Eliminate time, effort and cost for onsite PC or classroom setup. All setup, installation and configuration is handled remotely by LearnQuest staff.
- ◆ Choice of VoIP or telephone. If you have a headset or speakers and a microphone, you can choose to attend the training via VoIP technology. If not, dial into the provided conference bridge.
- ◆ Greater flexibility with last minute registrations. Allows registrations for a scheduled class up to three days prior.
- ◆ Savings passed on to you. No travel, no shipping, no extra costs...
- ◆ Make a difference! Every enrollment in a LearnGreen class includes a donation to The Conservation Fund organization. For the past 25 years, The Conservation Fund has been America's partner in conservation, protecting more than 6.5 million acres.
