# Custom Learning Portal

LearnQuest partners with preferred clients to build innovative training programs by developing branded portal sites to provide an extensive catalog of classroom, virtual instructor-led, and self-paced courses available to IT employees at discounted pricing.

These custom Learning Portals allow students to access information on hundreds of technical training courses offered by LearnQuest, as well as vendor authorized training for software vendors, such as IBM, Oracle, Microsoft, and others. LearnQuest works closely with each client's technology leaders to ensure that the training provided addresses both the foundational aspects of the technology and the specific needs of the client.

To guarantee maximum training benefits, LearnQuest provides a dedicated support team responsible gathering customization requirements, designing the portal processes and workflow, and including website page content, registration and payment processing as well as administrative reporting. After the portal is introduced, LearnQuest continues to work with clients through regular status and strategy meetings to discuss improvements and update new features to the site.
